### **DETAILED ACTION**

Claims 21-36 are new, pending and under consideration.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Specification***

The disclosure is objected to because of the following informalities: the primer sequences at pages 24 and 25 needs associated SEQ ID Nos. Inserting the corresponding SEQ ID NO next to each of the primer sequence would obviate this objection. Appropriate correction is required.

### ***Claim Objections***

Claims 35 and 36 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 35 and 36 are not further limiting claim 32, which depends on the base claims 22 and 23, drawn to method involving prediction of prognosis, i.e. mutation in the conserved regions II and V as compared to a mutation outside of the conserved regions I-V indicates poor prognosis. Claim 35 says that a 2 base pair insertion at positions 340 and mutation at position 28, and other mutations not in the conserved regions II and V are poorer outcome, which contradicts with the limitation in claim 22. The positions 340, for example is outside of the conserved region II or V. In addition, the base claims do not

say anything about the node status. Claim 36 has same problems, for example positions at 36, 317, etc.

***Claim Rejections - 35 USC § 112***

Claims 21-36 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 21, the limitation in step c) (ii) is new matter because the specification as originally filed at page 16, and Fig. 6 discloses that node positive patient who received adjuvant therapy, regardless of the p53 mutations had poor prognosis.

The limitations in claim 22 step c), lines 5-7, the step c) of claim 23, and claim 34 are also new matter. The specification at page 16 lines 30-38 discloses that the prognosis of a patient with a mutation in the conserved region III, and IV is “not more serious to the patient than mutation outside conserved regions” or “no significant difference in relapse-free survival rate for a patient with a mutation in conserved region III compared to patient with a mutation outside conserved regions”. In summary, the specification as originally filed does not disclose any positive outcome. In addition, the specification as originally filed does not have support for “applying the adjuvant therapy to the patient if the mutation is found in conserved region III or conserved region IV” in claim 23 step d).

The dependent claims are also rejected because the rejected limitation of the base claim is required to practice the dependent claims.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
